

Raju Kumar Paswan

Full Stack Developer • Android Developer • AI Enthusiast

24mca00py00llopondiuni.ac.in • 8709518993 • linkedin.com/in/raju-kumar-676447378 • Puducherry, India

PROFESSIONAL SUMMARY

Full Stack & Android Developer with hands-on experience building end-to-end web and mobile applications. Skilled in developing AI-integrated products, RESTful APIs, and database-driven systems. Demonstrated ability to ship production-quality apps (mental wellness, civic-tech, fintech) using modern stacks. 2nd Runner-Up at an IIT Ropar FINTECH Cybersecurity Hackathon. Passionate about applying machine learning and scalable systems to solve high-impact real-world problems.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, Kotlin
Frontend: HTML5, CSS3, React.js, Bootstrap, Responsive Design
Backend: PHP, MySQL, REST APIs, Firebase

Mobile: Android (Kotlin), MVVM, Firebase Auth, Realtime DB
AI / ML: TensorFlow Lite, Explainable AI (XAI), Generative AI
Tools & Other: Git, GitHub, VS Code, OOP, DSA, UI/UX, Agile

INTERNSHIP & EXPERIENCE

AI Development Intern

2026 — Present

National Institute of Electronics and Information Technology (NIELIT)

Ropar, Punjab, India

Working on AI and web development projects under NIELIT's AI Development Associate programme, building intelligent features and integrating ML models into production web applications.

Gaining hands-on exposure to model deployment, data preprocessing pipelines, and AI-driven API development aligned with real government digital initiatives.

PROJECTS

MindNest — Mental Wellness Android App

Kotlin, MVVM, Firebase Auth, Realtime DB

Built a full-featured Android wellness app with guided workouts, mood tracking, personal journals, and therapist search — architected on clean MVVM pattern.

Integrated an AI-based wellness chatbot for real-time user support, with Firebase Auth for secure login and Realtime DB for live data sync.

Smart Rural Grievance & Service Management System

HTML, CSS, JavaScript, PHP, MySQL

Developed a civic-tech web platform enabling rural citizens to digitally register and track public service complaints — reducing manual overhead for local officers.

Implemented role-based access control across citizen, officer, and admin modules; full complaint lifecycle management from submission to resolution.

HACKATHON & ACHIEVEMENTS

FINTECH Cybersecurity Hackathon — 2nd Runner-Up

2026

Team Innouexa | IIT Ropar

Built an on-device AI SMS fraud detection system using TensorFlow Lite, enabling real-time classification without sending data to the cloud.

Implemented Explainable AI (XAI) to surface transparent fraud reasoning to end-users and integrated automatic malicious-link blocking.

Designed a privacy-first, offline-capable architecture — critical for low-bandwidth rural and semi-urban environments.

EDUCATION

Master of Computer Applications (MCA)

2024 — 2026 (Expected)

Pondicherry University (Central University)

Puducherry, India

Bachelor of Computer Applications (BCA)

2021 — 2024

Aryabhatta Knowledge University

Patna, India

CERTIFICATIONS

AI Development Associate — NIELIT Chennai (Pursuing)

Android Development — Udemy (Pursuing)

Full Stack Web Development — Physics Wallah (PW)

The Joy of Computing Using Python — NPTEL

The Brains Behind Generative AI — VIT

Blockchain Technology & Applications — IIT Kanpur, IIT Roorkee, MNIT Jaipur
